

# Credit Card Extension

An Integrated and Flexible Solution for Microsoft Dynamics™ GP

## Enhance Microsoft Dynamics™ GP with Credit Card Processing and Control Your Cost

Azox Credit Card Extension integrates with multiple gateways providing reliable service and a PCI compliant solution for credit card processing within Microsoft Dynamics™ GP. Teaming with industry-leading providers, Azox offers real choices with the flexibility to configure the solution that best fits individual customer needs. Whether creating a new merchant account or maintaining a trusted relationship, Azox Credit Card Extension provides the highest levels of security and flexibility available in the industry.

Azox Credit Card Extension for Dynamics™ GP is available in the United States, Canada, the United Kingdom and Australia and supports all English versions of Microsoft Dynamics™ GP.

## Benefits

“The *integrated* Credit Card Extension from Azox lets me use one system for both my on-line credit card orders and my Dynamics GP™ orders.”

“The *flexibility* of the system allows us to charge the credit card from several windows. Now we can validate and process a transaction anytime.”

“The discount rate offered for our credit card integration *saved* us more than we paid for the software.”

“Credit Card Authorization Processing *streamlined* our operations. Sales Reps can now validate a credit card right from the Dynamics GP™ Sales Transaction window.”

“Daily settlement of our merchant account is *convenient* and easy.”

## Main Features

- Azox Credit Card Extension provides the ability to process credit card transactions within multiple windows.
- It provides encrypted storage and retrieval of multiple credit card numbers for each customer in Dynamics™ GP Windows
- Supports multiple merchant accounts for each company.
- Allows for partial fulfillment of approved credit card transactions

The image shows two screenshots of the Microsoft Dynamics GP software interface. The top screenshot is the 'Credit Card Transaction Entry' window, which contains various fields for entering transaction details. The bottom screenshot is the 'Credit Card Authorization' window, which displays a table of authorized transactions.

## Integration

- Integrates with Microsoft Dynamics™ GP Sales Order Processing and Receivable Management modules.
- Integrates with Azox e-commerce suite: eSource™ B2B, B2C, and Sales Rep sites.
- Integrates with multiple gateways providing reliability and industry standard fraud filter capability.
- Current gateway providers include Verisign, Paymentech, PayPal, PPI Paymover, Moneris, and Cybersource.
- Additional providers may be available. Please contact [sales@azox.com](mailto:sales@azox.com) for a current list of gateway and merchant account providers.

## Verification and Fraud Prevention

- Supports AVS (Address Verification Service)
- Supports CVV2 (Card Verification Value) to mitigate fraud risks
- Supports Level 2 and Level 3 Verification
- Provides industry leading fraud prevention options
- Allows the use of Gateway Fraud Filter
- PCI Compliant

## Credit Card eInterface

Azox also provides fully integrated, streamlined Credit Card eInterface product for eSource and other e-commerce shopping environments. The Credit Card eInterface allows e-commerce users to conduct credit card transactions through the internet e-commerce site. Real-time credit card transactions are processed and can be managed in Microsoft Dynamics™ GP.

## Additional Features

- Defaults credit card transaction type automatically based on sales document type and transaction history.
- Allows manual entry or updates of credit card information.
- Reauthorizes expired authorizations by batch.
- Assigns security levels for each user class based on credit card transaction types
- Auto-populates Dynamics™ GP in sales payments entry window for approved sale/post authorization credit card transactions.
- Provides credit card transaction with report, receipt, and specific transaction inquiry.

## System Requirements

- Azox Credit Card Extension module can be installed on any workstation using Windows NT, Windows 2000, XP, Vista or Terminal Server.
- Available for Microsoft Dynamics™ GP versions 8.0 to 10.0
- Requires SQL Server 2000 or higher.
