

# Serial Lot Copy&Paste Manager™

For Microsoft Dynamics™ GP

## Streamline Order Processing Procedures

The **Serial Lot Copy&Paste Manager™** accelerates serial and lot number entry for the Purchase Order Processing, Sales Order Processing, Returns Management Authorization and Manufacturing modules. As an easy-to-use solution that integrates seamlessly with Microsoft Dynamics GP, organizations will improve the accuracy of their serial and lot number data entry processes while increasing accuracy and employee productivity. If your business is spending too much time with serial and lot number entries, the **Serial Lot Copy&Paste Manager™** will eliminate those common bottlenecks so you can focus on key decisions that will help drive your business to the next level.

## Flexible and Convenient

Designed for maximum flexibility and convenience, the **Serial Lot Copy&Paste Manager™** streamlines data entry procedures by copying and pasting multiple serial or lot numbers from a flat file (.xls, .txt, etc.) into Microsoft Dynamics GP. Intuitive options allow users to experience more control over their inventory data, such as copying and pasting from tab delimited data files or from Microsoft Dynamics GP. New lot numbers can also be added directly on-screen to allow for accelerated transaction entry. To ensure accuracy against duplicate entries, each serial or lot number is validated against both the work and the history tables.

## Industry Use

Finding the right software in today's hyper competitive market can be hard. Binary Stream Software focuses on your success by providing solutions that will increase organizational efficiency and effectiveness. Although this is a cross industry solution, the **Serial Lot Copy&Paste Manager™** is ideal for distribution, retail, manufacturing, and wholesale related industries.

## Support and Customizations

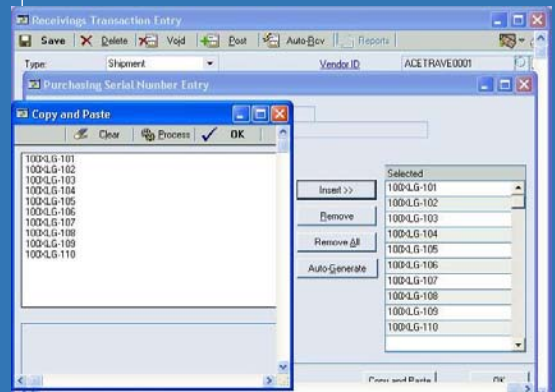

At Binary Stream Software, support is a top priority. We provide 100% knowledge transfer to Partners and clients. Over 90% of queries are resolved through training with additional support and customization packages for enhanced coverage. Within a three hour response time, questions and problems are resolved by our dedicated technical support team.

## Product Overview

- Accelerate serial lot and lot number entry
- Increase accuracy of data entry
- Increase worker productivity
- Reduce data entry and operational costs
- Integrates seamlessly with **Microsoft Dynamics GP**

### Accelerate

*serial or lot number entry from any tab delimited data files*

## Great Plains Integration

Built with the Dexterity™ development tool for stability, the **Serial Lot Copy&Paste Manager™** is a flexible tool that integrates into the POP, SOP, Inventory Control, and Manufacturing modules within **Microsoft Dynamics GP**. The data entry screens are straightforward and can be customized to your specific needs.
