

vShip

Integrated Fulfillment and Shipping for Microsoft Dynamics™ GP

Using vShip, sales orders from Microsoft Dynamics GP flow directly into vShip enabling fulfillment and pack verification, rating, rate shopping, report and label printing. Once the shipping process is complete, vShip automatically writes customer-required shipping information back to Microsoft Dynamics GP.

Put vShip to Work for You

- Reduce Business Transaction Costs
- Manage Customer Compliance
- Improve Order and Shipping Accuracy
- Accelerate the order-to-cash process

The screenshot displays the vShip software interface for creating shipments. It includes a menu bar (File, Configuration, Process, Inquiry, Reports, Windows, Help, Function), a sidebar with navigation options (E1-Help, E2-New Shipment, E6-New Container, E7-New Master, E8-New Order, E9-Shipment Options, E10-Commit, E11-Shipment Tree), and a main workspace. The workspace shows shipment details for Shipment Number 0007068, including shipping method (SMALL PRCL SHOP - Small Parcel Rate Shop), carrier (Rate Shopping), and ship date (6/14/2007). It also displays container details (Carton type, dimensions, weight) and a table of items in the container. The items table has columns for Description, Start, Shipping, and Remaining. The items listed are 100XLG Green Phone, SPK100 Speaker 7/8, and ACCS-CPC-12WH Phone Card - 12" White.

Description	Start	Shipping	Remaining
100XLG Green Phone	100	100	0
SPK100 Speaker 7/8	75	75	0
ACCS-CPC-12WH Phone Card - 12" White	200	20	180

Transfers sales orders from Microsoft Dynamics GP to the warehouse floor

vShip is just one of many solutions vSync offers to assist customers in managing EDI and Shipping Compliance. vSync Add-On Products include:

- vSync EDI
- vSync ASN Manager
- vSync VTN
- vSync Remote Warehouse
- Advanced EDI Translator Package
- AS2 Communications
- Remittance Automation

Features

- Complete integration back to Microsoft Dynamics GP (quantity fulfilled, freight, tracking numbers, and more)
- Pack verification and processing work flow
- Multi-Carrier Compliance for US parcel carriers (UPS, USPS, FedEx) with support for over 400 Less-than-Load (LTL) carriers
- Affordable - Less than half the cost of comparable providers
- Supports international shipping for UPS, FedEx and USPS
- Powerful Rate Shopping and Freight Cost Administration
- Out-of-the-box EDI Integration to generate Advance Ship Notices (ASNs)
- Stores customer-specific shipping data for improved trading partner compliance
- Supports a wide variety of data collection tools (scanners, printers, scales)
- Eliminates stand-alone shipping workstations

ISV/Software Solutions

Key Benefits and Features

Reduce Business Transaction Costs

- Built-in integration to Microsoft Dynamics GP enables sales order data to flow seamlessly from sales order processing to vShip
- Consolidates picked items into cartons or pallets and processes case packs
- Supports most carrier service options including dim-weight rating, COD and residential services
- Link your company's shipping method codes to a specific carrier service or evaluate several carrier rates through rate shopping
- Rate shop between small parcel and Less-than-Load (LTL) carrier service levels to select cost efficient methods

Manage Carrier and Customer Compliance

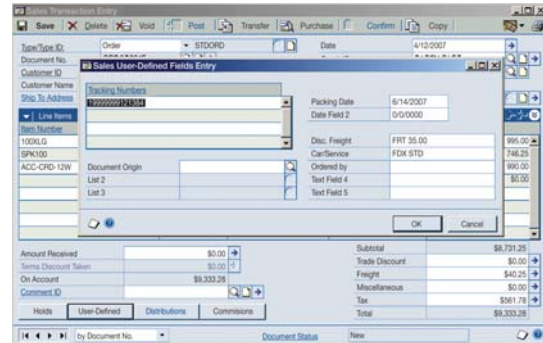

- Multi-carrier compliance for both Small Parcel Carriers and Less-than-Load (LTL) carriers
- Built-in EDI integration to generate Advance Ship Notices (ASNs) and UCC-128 labels with vSync's ASN module
- Set up and store customer-specific shipping data such as packing instructions, carrier preferences and account numbers
- Generates packing lists and carton content labels
- Supports shipment notification to customers via email
- Supports straight and VICS Bills of Lading (BOL)

Improve Order and Shipping Accuracy

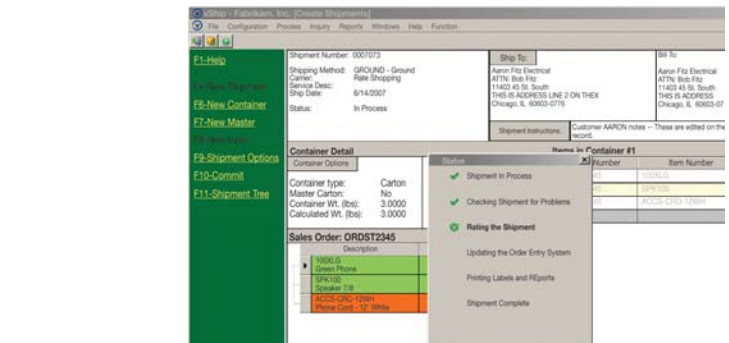

- Processes shipments from Microsoft Dynamics GP sales orders
- Supports Microsoft Dynamics GP serial and lot controlled items as well as multi-bin environments
- Verifies item numbers against order requirements for packing
- Calculates freight costs based on your specific carrier discounts or published rates
- Generates carrier-compliant labels, COD tags and manifests
- Provides complete visibility of orders including shipment status and carrier information

Streamline Shipping Processes

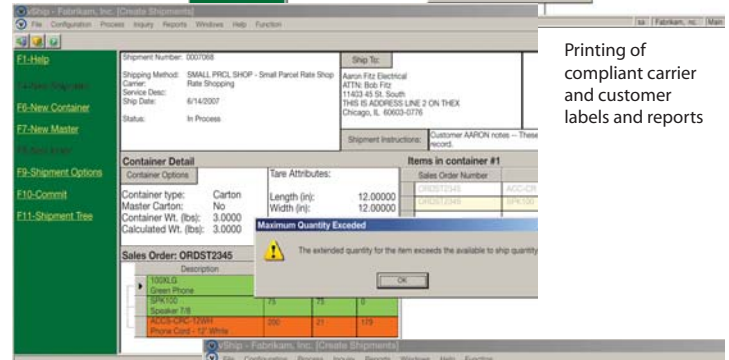

- Eliminates stand-alone shipping work stations. One system provides access to Small Parcel Carriers (UPS, USPS and FedEx) and support for more than 400 Less-than-Load (LTL) carriers
- System maintains annual carrier rate updates and will update LTL contracted rates as contracts are renewed
- Reduces order entry by linking all shipping data to the order and invoice
- Automatically updates freight costs and sales order quantities

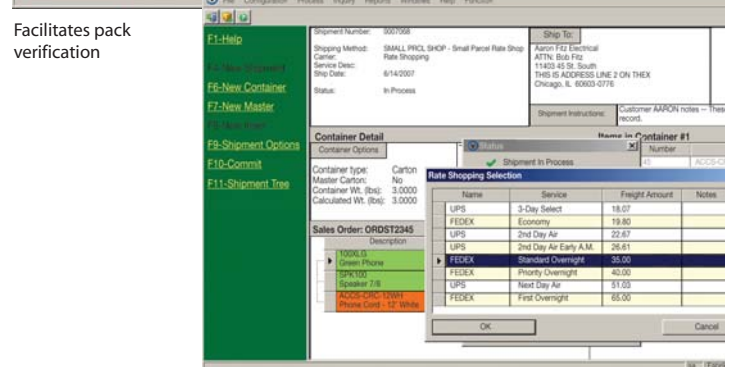

Writes shipping data back to Microsoft Dynamics GP

Printing of compliant carrier and customer labels and reports

Facilitates pack verification

Automated Rate Shopping
