

eMailer Manager™

Manager Series

For Microsoft Dynamics™ GP

Making the Right Choice

Finding the right electronic document delivery solution can be a difficult task in today's market. Fortunately, **eMailer Manager™** is dedicated to helping you work smarter and quicker to deliver your critical business documents from Microsoft Dynamics GP to your customers, employees, and vendors. It can be used by any industry that requires multiple SOP, POP, EFT Payables, and Employee Payroll remittances to be sent through email, fax or EDI. As a Gold Certified Microsoft Partner, Binary Stream provides best-of-breed solutions that reduce operational costs and increase the value of Microsoft Dynamics GP.

Superior Performance

The **eMailer Manager™** is a leading document delivery solution for batch processing within Microsoft Dynamics GP. Most documents, such as customer invoices, statements, EFT payables remittances, and purchase orders can be emailed or faxed within a single process. Selected documents are automatically converted to PDF files and are emailed via Microsoft® Outlook or IBM® Lotus Notes. For faxing, WinFax Pro and RightFax are supported. Depending on your hardware setup, eMailer Manager can send thousands of documents at a time. Save your time and money by mass delivering documents today!

Seamless Integration

The **eMailer Manager™** is a flexible enhancement that offers true seamless integration to Microsoft Dynamics GP and replicates the standard user interface. As one of the most efficient and user intuitive solutions in the market, you will realize the full benefit of a Dexterity based solution. Streamlined document delivery is achieved without the need to log in out of separate systems. Whether you're drilling down on invoices or updating purchase orders, you'll experience true seamless integration across Microsoft Dynamics GP.

Flexible and Convenient

The **eMailer Manager™** data entry screens are straightforward and can be customized to your specific needs. You can create generic or recipient specific Email/fax subject and body text, auto-attach many documents to each email or fax, and send the same email/fax to multiple contacts. When processing documents, users can also select documents based on a variety of filters such as sending packing slips, picking tickets, kit components, standard reports and more! There is also the ability to inquire on the delivery status of emails.

The Perfect Solution

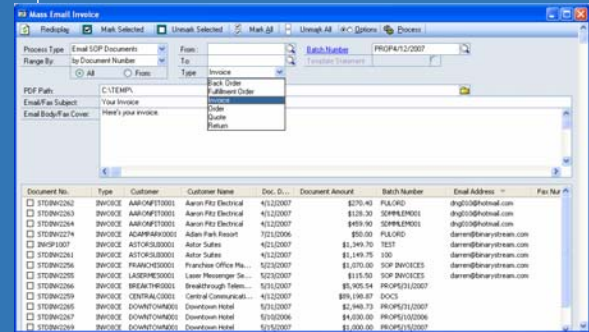

Binary Stream Software focuses on your success by providing solutions that will increase organizational efficiency and effectiveness. If your business is looking to maximize document processing efficiency, the **eMailer Manager™** could be the right choice for you. Contact Binary Stream Software today and learn how eMailer Manager can work for your organization.

- Establish better relations with vendors
- Native fax support for WinFax PRO
- Replicates the interface of **MS Dynamics GP**
- NO additional database setup & costs

“Before we got Binary Stream on board to do some custom development for us, we had a tremendously labor-intensive billing process that lacked the ability to efficiently service our large customer base. With Binary Stream’s help, we were able to streamline our entire billing process and reduce invoice processing time from 4 – 5 days a month to less than an hour. When choosing the right partner to work with, Binary Stream’s history of development experience guarantees that their customization services will always exceed expectations.”

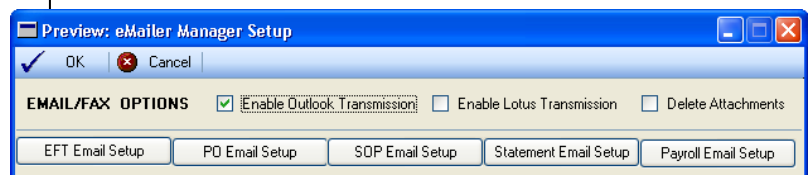

Mark DeMello, Peer 1 Network

Support and Customizations

At Binary Stream Software, customer satisfaction and support is our top priority. If you would like to customize this product specific to your business, we would be more than happy to provide you that service. We also provide 100% knowledge transfer to Partners and clients. Over 90% of inquiries are resolved through training and support.
